

FIBERGLASS ENTRY DOOR COLLECTION

Strength meets elegance with KH-DOOR

KEHAO DOOR

INTRAVAST

Website

ABOUT

KH-DOOR is dedicated to enhancing the comfort and beauty of your home with our range of doors. Each fiberglass door is meticulously crafted in our 1.6 million square feet manufacturing facility, utilizing advanced automated techniques, such as numerical control CNC centers, to provide lasting value while maximizing aesthetic appeal.

We aim to meet your personal style preferences, seamlessly blending into your home decor. Whether you prefer traditional charm or modern elegance, our diverse options of wood grain textures or smooth finishes can suit your taste.

We take pride in using only the finest fiberglass materials, known for their strength, energy efficiency, and low maintenance. All our materials are high-quality, sourced through long-term local partnerships, ensuring durability and performance.

KH-DOOR doesn't just manufacture doors; we are your reliable partner in crafting elegant, practical, and secure entryways for your residence.

ADVANTAGES	KH PREMIUM Series
Detailed Wood Patterns and Smooth Skin	✓
Plant-Based Foam, 3 lb./cu. ft. Density	✓
Standard 2 lb./cu. ft. Urethane Foam	not needed
Waterproof and Mold-resistant	✓
Reinforced Stiles at Door Edges	✓
Lock Blocks at Both Sides of Door	✓
Moisture-resistant Composite Rails	top and bottom
Non-solvent Finishing System	✓
Ultra-Low VOC Finishing Process	✓
No HAPs During Finishing Process	✓
Production utilizes low-toxicity MDI	✓
Styrene-free Foam or Finish	✓
High Quality and Diverse Hardware	✓
Glass Options: Clear, Low-E, Privacy and Decorative	✓
PVC Door Jamb and Wooden Door Jamb	✓

Features

- 1.The top and bottom rails are crafted solely from composite, guaranteeing decay resistance and total waterproofness.
- 2.Using Wide LVL Laminated Strand Lumber stiles on both door edges greatly reduces warping risks and securely mounts door hardware, ensuring stability and durability.
- 3.KH-DOOR offer stunning finishes with authentic wood grains or sleek non-textured surfaces. These are crafted using a water-based process, ensuring zero emission of hazardous air pollutants.
- 4.The fiberglass-reinforced door skin accurately replicates intricate wood grains or smooth skin, delivering a high-definition aesthetic.
- 5.The PVC door frame offers advantages such as durability, weather resistance, ease of installation, low maintenance, and an aesthetically pleasing appearance.

DOOR CONSTRUCTION

WOOD GRAIN COLLECTION

1-3/4" DOOR

- Woodgrain fiberglass facing
- Composite capped LVL stiles
- Composite top and bottom rails
- Polyurethane foam core
- 12" lock block

SMOOTH COLLECTION

1-3/4" DOOR

- Smooth fiberglass facing
- Composite capped LVL stiles
- Composite top and bottom rails
- Polyurethane foam core
- 12" lock block

JAMB OPTIONS

Jamb options

PRE-PRIMED WOODGRAIN/ SMOOTH PVC JAMB

Versatile and high-performance solution designed for both woodgrain and smooth fiberglass doors. Our jamb offers several key benefits:

- Low-Maintenance:

Engineered to resist rot, moisture absorption, and insect damage, ensuring durability and longevity with minimal upkeep.

- Energy-Efficient:

Superior thermal insulation properties reduce heat transfer, enhancing the energy efficiency of your home compared to traditional frame materials.

Size:

Nominal Heights: 80"/96"

Widths Options: 4-9/16"~5-1/4"~6-9/16"~8-9/16"

PRE-PRIMED WOOD JAMB

- Our pre-primed finger-jointed wooden jambs are expertly prepared with a white primer, making them ready for painting. These jambs are designed to require regular maintenance throughout the door's lifespan to ensure optimal performance and appearance.

- The wood jamb is integrated with the KH-DOOR Sill Key System, ensuring that the jamb bottom does not rest directly on the subfloor or sill, significantly reducing the risk of water damage and prolonging the durability of the door frame.

Size:

Nominal Heights: 80"/96"

Widths Options: 4-9/16"~5-1/4"~6-9/16"~8-9/16"

STEP BY STEP DESIGN YOUR ENTRY DOOR

1. Choose Your Entryway

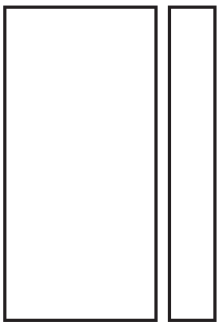

A. Select a combination to fit your needs

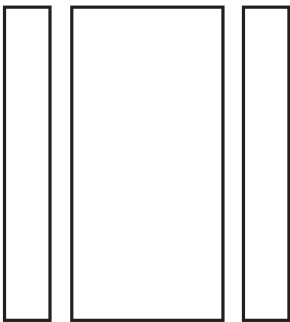

Single Door

**OFFERING ENERGY EFFICIENCY, COMFORT,
AND DURABILITY, MAKING THEM AN IDEAL
CHOICE FOR ANY SPACE-----LOW-E GLASS
DOOR.**

ABOUT LOW-E GLASS DOOR

Energy Efficiency and Insulation:

LOW E door panels, equipped with LOW-E (Low-Emissivity) technology, excel in energy efficiency. Their special coating effectively reflects infrared radiation, significantly reducing heat transfer and energy loss. This ensures superior insulation, keeping interiors warm in winter and cool in summer, thus lowering energy consumption and costs.

Temperature Control:

The LOW E coating on these door panels provides excellent temperature control. In colder months, it reflects indoor heat back into the room, enhancing thermal comfort and reducing the need for additional heating. During warmer seasons, it helps keep outdoor heat at bay, lessening the reliance on air conditioning.

Environmental Friendliness:

By reducing energy consumption, LOW E door panels contribute to a more environmentally friendly living space. Less energy usage means fewer carbon emissions, aligning with sustainability goals and eco-friendly living standards.

Durability and Aesthetics:

LOW E door panels are designed for durability, lasting longer than conventional door panels. Additionally, they maintain their aesthetic appeal, blending seamlessly into any interior design while providing the added benefits of energy efficiency.

Versatility and Compatibility:

LOW E technology can be applied to a wide range of door panel materials and styles, making it versatile and compatible with various architectural and interior designs. This flexibility allows for easy integration into both residential and commercial spaces.

Comfort and Quietness:

LOW E door panels not only offer thermal comfort but also contribute to acoustic comfort by reducing noise transmission, creating a calmer and more peaceful indoor environment.

In summary, LOW E door panels provide superior energy efficiency, temperature control, environmental friendliness, durability, aesthetics, versatility, and comfort, making them an ideal choice for a wide range of applications where energy conservation and comfort are key considerations.

DECORATIVE GLASS COLLECTION

Decorative glass

Employing solid metals with all joints meticulously soldered by hand guarantees the panels' durability and resilience against daily wear and tear.

After assembly, the panel undergoes a rigorous cleaning and inspection routine. Our meticulous attention to detail ensures that we deliver quality products to you.

GLASS PRIVACY RATING

EXTERIOR DOOR GLASS CONFIGURATIONS

Decorative glass inserts boost your entry door's look. Select your privacy level and add optional coming for more detail.

Specialty glass can provide privacy, filter light, or simply make a dramatic statement. Below are some of the most popular styles of specialty glass from Architectural Glass Effects. From traditional to modern, our glass suppliers have hundreds of styles to meet your needs.

CAMING OPTIONS

Decorative glass

Caming refers to the metal strips that seamlessly unite glass panels, creating a distinctive design. Put simply, it serves as the equivalent of "lead in traditional leaded glass."

When selecting a caming finish, ensure it harmonizes with your door hardware, outdoor accessories, and indoor furnishings, aligning with your personal aesthetic. Though it may appear as a minor aspect, it can significantly influence the overall visual appeal of your entrance.

WROUGHT IRON DECORATIVE GLASS

Wrought Iron

The artful combination of wrought iron and glass in crafts creates a unique and captivating aesthetic. This blend of materials not only showcases the masterful craftsmanship involved but also offers a visually appealing result.

The glass panels can be embedded within the wrought iron design or paired with wrought iron elements to create a harmonious visual effect.

This combination offers both practical benefits, such as light transmission and ventilation, as well as enhanced visual appeal.

The designs and patterns achieved through wrought iron craftsmanship are endless.

These designs can be further accentuated by the addition of textured or colored glass, creating a unique and personalized aesthetic.
